PROJECTS

DECYPHER

[Rails](#)[React](#)[LIVE SITE](#)[Redux](#)[GITHUB](#)[PostgreSQL](#)

Genius-inspired website that allows users to analyze and annotate lyrics

- Employed polymorphic associations in the Rails backend for voting and comments
- Utilized custom highlighting implementation allowing users to annotate songs
- Features full CRUD of comments, songs, annotations, and votes for a complete user experience

TYPING DEAD

[JavaScript](#)[HTML5](#)[LIVE SITE](#)[Canvas](#)[GITHUB](#)[Firebase](#)

Typing game featuring zombies

- Integrated Google Firebase API to persist high scores in the cloud
- Throttled animation frame rate to ensure smooth game play

DOLLAREL

[LIVE SITE](#)[GITHUB](#)[JavaScript](#)

JavaScript library that allows for DOM manipulation and interaction

- Constructed library based on jQuery that allows selection, modification, and traversal of DOM elements

EXPERIENCE

SOFTWARE ENGINEERING TA

App Academy (Mar 2019 - Present)
New York, New York

- Provide tutoring to incoming students in Javascript fundamentals
- Grade assessments and provide feedback on code style and best practices
